EDITOR'S NOTES

I. *Wenzhou Statistical Yearbook 2012* is an annual statistics publication, which covers very comprehensive data in 2011 at the scope of whole municipality, and major data in main historical years and recent years, and major data breaking down to county (city, district) level, and therefore, reflects various aspects of Wenzhou's economic and social development. Series of main historical data are presents in each chapter, thereby reflecting progresses of Wenzhou since 1949 when the Peoples' Republic of China established, or 1978, the year when Reforming and Opening up started.

II. The book contains the following 10 chapters: 1. General Survey, 2. Agriculture, 3. Industry, Transportation and Communication, 4. Investment in Fixed Assets and Construction, 5. Domestic Trade and Foreign Economic Relations, 6. Financial Intermediation and Public Finance, 7. Social Undertakings, 8. Employment and Wages, 9. Market Prices and People's Lives, 10. Appendix, which includes main indicators of whole nation, Zhejiang Province and its municipalities, and main statistics from National Censuses in Wenzhou in recent years, which including the 5th and 6th Population Census, the 1st and 2nd Economic Censuses, and the 2nd Agricultural Census.. In addition, Explanatory Notes on Main Statistical Indicators are provided at the end of each chapter.

III. The data in this book are in accordance with Territorial Principle. Data of urban districts are totaled by districts of Lucheng, Longwan and Ouhai, and departments directly under the administration of municipality. Data of Longwan include that of Wenzhou Economic and Technological Development Zone. The region named as "Municipal Level" refers to a collectivity of units that are directly under the jurisdiction of municipal government, which is not a real geographic region. Traditionally, the data of region "Municipal Level" is a component within "Urban Districts", and part of data for "Municipal Level" has now been summed to the region where they are actually located in. The whole municipal historical data in series from the founding of PRC to nowadays are collected within today's administrative area, but that of counties (cities, districts), within then original area. Data of Cangnan are included in that of Pingyang before 1980, the year when Cangnan was separated from Pingyang and established as a county. Historical data of Cangnan, Lucheng, Longwan and Ouhai are collected since the year when they were established as a county or district. Since 2009, data of those institutions at municipal level has been merged into that of Lucheng, since most of them were located within the territory of Lucheng district.

IV. The data in this book are obtained from annual statistical reports by statistical department and other departments of government. The data of enterprises

below designated size within indusdrial, trade and service sectors, market prices and residents' lives are from sample surveys.

V. As a follow-up measure of the 2004 First National Economic Census and the 2008 Second National Economic Census, the GDP and value-added of the secondary and tertiary industries of 1992-2008, as well as their growth rate, had been revised. All these revised data, which are collected in this book, should be seen as valid data.

VI. The data of various years are in conformity to the statistical standards prescribed by national statistical system of the time. The meaning, scope and calculating method of indicators may have some difference in different periods, which readers must pay attention to. The main changes in recent years are shown as following:

1. a new National Standard Industrial Classification (GB/T4754-2002) has been implemented since 2002, whilst a new enterprise size division standard has been implemented since 2003;

2. in statistics on industry, enterprises "above designated size", before 2010, refer to industrial enterprises with an annual sales income of over 5 million yuan, and before 2006 they also included all state-owned enterprises, even without the designated sale income. However, since 2011, they refer to industrial enterprises with an annual sales income of over 20 million yuan.

3. in statistics on trade industry, criteria for "above designated size" are: to wholesale enterprises, with an annual sales income of over 20 million yuan; to retail enterprises, 5 million yuan; to catering services enterprises, 2 million yuan;

4. in statistics on investment, projects "above designated size" refer to those with planning investment above 5 million yuan;

5. output value of rural households' side industry, which was added into that of agriculture since 1980, has been merged into gross output value of industry since 2002, while output value of service activities for agriculture was added into that of agriculture since 2003.

VII. The units of measurement used in this yearbook are internationally standard measurement units, and newly published and implemented Standard Industrial Classification and Product Categories are uniformly used.

VIII. In this book, data in value terms such as GDP and gross output value of industry and agriculture are at current prices, except those with special comments. Data in terms of growth rates are calculated at comparable prices.

IX. If there are several data different from former yearbook, those in this book should be regarded as authentic. Notations used in this yearbook are: "#", indicates the items breaking down from the total; " " (blank), indicates the data be zero or not available."

主要指标解释

土地资源 土地指陆地的表层部分,它主要由岩石、岩石的风化物和土壤构成。土地资源按利用类型可以分为农用地、建筑用地和未利用地。农用地包括耕地、园地、林地、牧草地和水面。建筑用地包括居民点及工矿用地、交通用地和水利设施用地。未利用地指农用地和建筑用地以外的土地,包括滩涂、荒漠、戈壁、冰川和石山等。

水资源 水在自然界中以固体、液体和气态三种聚集状态存在,分布于海洋、陆地(包括土壤)以及大气之中,通过水循环形成水资源。水资源包括经人类控制并直接可供灌溉、发电、给水、航运、养殖等用途的地表水和地下水,以及江河、湖泊、井、泉、潮汐、港湾和养殖水域等。水资源是发展国民经济不可缺少的重要自然资源。

人口出生率 $=\frac{\text{年出生人数}}{\text{年平均人数}}$

人口死亡率 $=\frac{\text{年死亡人数}}{\text{年平均人数}}$

人口自然增长率 $=\frac{\text{本年出生人数}-\text{本年死亡人数}}{\text{年平均人数}}$

地区生产总值 是按市场价格计算的地区生产总值的简称。它是一个国家(地区)所有常住单位在一定时期内生产活动的最终成果。地区生产总值有三种表现形态,即价值形态、收入形态和产品形态。从价值形态看,它是所有常住单位在一定时期内所生产的全部货物和服务价值超过同期投入的全部非固定资产货物和服务价值的差额,即所有常住单位增加值之和;从收入形态看,它是所有常住单位在一定时期内所创造并分配给常住单位和非常住单位的初次分配收入之和;从产品形态看,它是最终使用的货物和服务减去进口货物和服务。在实际核算中,地区生产总值的三种表现形态表现为三种计算方法,即生产法、收入法和支出法。三种方法分别从不同的方面反映地区生产总值及其构成。

三次产业 三次产业的划分是世界上较为常用的产业结构分类,但各国的划分不尽一致。我国的三次产业划分是:第一产业是指农、林、牧、渔业。第二产业是指采矿业,制造业,电力、煤气及水的生产和供应业,建筑业。第三产业是指除第一、二产业以外的其他行业。

Explanatory Notes on Main Statistical Indicators

Land Resource Land refers to t he surface of the earth, consisting of mainly rocks and its weathering and earth. Land resource can be classified, by its utilization, as land for agriculture, land for construction and unused land. Birth Rate $=\frac{\text{Number of Births}}{\text{Average Number of Population}}$

Death Rate $=\frac{\text{Number of Deaths}}{\text{Annual Average Number of Population}}$

Natural Growth Rate of Population $=\frac{\text{Number of Births}-\text{Number of Deaths}}{\text{Average Number of Population}}$

Gross Domestic Product refers to gross domestic product calculated at market prices, which is the final products of all resident units in a country (or region) during a certain period of time. Gross domestic product is expressed in three different forms, I. E. Value Added, income, and products respectively. In the practice of national accounting, gross domestic product is calculated with three approaches, I. E. Product approach, income approach, and expenditure approach respectively to reflect gross domestic product and its composition from different aspects.

Three Strata of Industry Classification of economic activities into three branches of industries is a common practice in the world, although the grouping varies to some extent form country to country. In China economic activities are categorized into following industries: Primary industry: refers to agriculture, forestry, animal husbandry and fishery. Explanatory Notes on Main Statistical Indicators

Gross Industrial Output Value is the total volume of industrial products sold or available for sale in value terms which reflects the total achievements and overall scale of industrial production during a given period. It includes the value of the finished products, which are not to be further processed in the enterprises and have been inspected, packed and put in storage, the value of industrial services rendered to other units and the changes in the value of the semi finished products and products in process between the beginning and closing of the period (only the enterprises with long production cycle are required to calculate the changes).

Heavy Industry refers to the industry which produces capital goods, and provides various sectors of the national economy with necessary material and technical basis. It consists of the following three branches according to the purpose of production or the use of products: (1) Mining, quarrying and logging industry refers to the industry that extracts natural resources, including extraction of petroleum, coal, metal and nonmetal ores and logging. (2) Raw materials industry refers to the industry that provides various sectors of the national economy with raw materials, fuels and power. It includes smelting and processing of metals, coking and coke chemistry, chemical materials and building materials such as cement, plywood, and power, petroleum refining and coal dressing. (3) Manufacturing industry refers to the industry that processes raw materials. Freight (Passenger) Traffic refers to the volume of freight (passenger) transported with various means. Freight transport is calculated in tons and passenger traffic is calculated in the number of persons. Despite the type of freight and traveling distance, the freight transport is calculated by the principle that one person can be counted only once in one travel.

Freight Ton-kilometer (Passenger-kilometer) refers to the sum of the products of the volume of transported cargo (passengers) multiplying by the transport distance, usually using ton-kilometer and passenger-kilometer as units for measurement.
